Consent for Refraction

Refraction (92015 billing code) is the procedure which allows your doctor to produce an eyeglass prescription for you.

Many insurances, including Medicare, do **not** reimburse the doctor for this service.

For those insurances that do reimburse for this service, we will bill them for it.

For all others, there will be a \$75 fee for refraction **payable at time of service.**

I agree to pay the \$75 fee for refraction at the time the services are rendered
